## Detoxification / Detox Box

Relax the mind and Energise the body.. The Detox Box uses safe naturally occurring far infrared rays to effectively detoxify many of the body's lifelong accumulated toxins and heavy metals. Improve blood and lymphatic drainage, skin tone and texture. The Detox Box aids in the conditions of arthritis, allergies, chronic fatigue, hypertension, weight loss, skin impurities and breakouts. By using the Detox Box it is possible to burn up to 600 calories in one 30 minute session.

At Marani we treat what you need at the time you need it. Our therapists are scientifically trained, qualified and experienced. Our reputation is based on our understanding of bodily organs, functions and structures with particular emphasis on skin conditions, their treatment and prevention. Our goal is to achieve everlasting health, energy and radiance. Our objective is to make your treatment visit memorable and unique. Service is our focus, it is consistent and it's very special.

Experience Marani, Experience the difference.

### The Ranges we stock are by Design

Our goal is to achieve maximum results in the safest way, using only scientifically proven and clinically trialed techniques and products, which are FDA/TGA approved.

**Ultraceuticals** is serious high tech evidence-based skin care with patented technology. Australian made and owned, this range of cosmeceuticals derived by Dr. Geoffery Heber, contains multi active products that are scientifically proven and TGA (Therapeutics Goods Administration) approved. A complete and comprehensive skincare range containing effective concentrations of active ingredients such as AHA, BHA, potent antioxidants, Vitamins A, C and E in their most active and useable forms, hydrators and UV sunscreens.

### Osmosis Pür Medical Skin Care

Luxurious All Natural Medical Skincare.

While Osmosis is one of the purest lines available, it is also physician formulated to be extremely effective without irritation. This is done through research proven ingredients specifically designed to repair skin condition through communicating with the skin rather than more traditional products that use harsh chemicals that traumatize and inflame the skin. In fact, Osmosis uses more research proven ingredients in their skincare than any other line in the world.

**PRIORI** is the industry technology leader developed by scientists considered as the anti-ageing authorities. The same scientists brought you AHA in 1983, Idebone in 2004 and CoffeeBerry in 2008. These top anti-ageing skincare technologies have been presented at the largest Dermatology meetings in the world and in world-renowned peer-reviewed journals.

**Skinstitute** is founded on the belief that serious, high end skincare should be accessible to everyone. For this reason, we offer the most effective, cosmeceutical range using top-quality, potent, cutting-edge ingredients from all over the world.

Professional grade, corrective skin care  
Visible results, not ridiculous claims  
Australian made, Australian owned  
Australia's leading cosmeceutical brand

## Specialised Skin Clinic Therapies

### Med 9

#### Regeneration - Repair - Recovery - Med 9.

Laser assisted healing for musculoskeletal & sports injury, scar & stretch mark repair, arthritis therapy and pain relief, eczema and psoriasis.

### Silky Smooth Skin.. for good!

#### Free Consultation SIPL - laser hair reduction

Our experienced therapists hold a laser Safety Officer certificate, ensure you get the most effective results while protecting and preventing damage to the skin.

ALL skin types, from the fairest to the darkest - both men and women and ALL body areas can be treated safely and effectively . . . super fast!

### Flawless Skin - Photo Rejuvenation

Improved skin tone and texture whilst safely and effectively treating skin conditions such as pigmented and vascular lesions, sunspots and spider veins, rosacea and rejuvenation.

### Anti Cellulite And Body Contouring - Endermologie

Cellulite is the uneven dimpling or "orange peel" appearance of the skin affecting more than 90% of women. Marani pioneered the use of Endermologie, a unique non-invasive way of shaping your body, reducing cellulite and improving general well being. It works by exercising the skin and body's connective tissue breaking down fibrosis around problem fat cells, improving blood circulation and lymphatic drainage. Collagen and elastin production is also boosted resulting in a healthier rejuvenated skin tone.

Endermologie is the first cellulite treatment in the world to be approved by the FDA (American Food and Drug Administration).

### Cosmetic Injectables - Mesotherapy & Botox

Injection LIPOLYSIS is a technique developed in Germany used to dissolve fat cells and significantly improve body sculpture and cellulite. Performed only by physicians who have undergone specialist training. It is a safe and gentle method of eliminating small accumulations of fat. Collagen fillers and anti-Wrinkle Injections are also available and performed only by certified specialist physicians.

### Omnilux Revive Skin Rejuvenation Therapy

Non invasive stimulation of fibroblasts to produce collagen and elastin resulting in gentle revival and plumping of the skin. Reduces pore size and improves hydration levels deep within the dermis. A facial beneath the skin provides a glowing more radiant and smoother complexion without the need for surgery. Also improves rosacea, redness, irritation and allergic skin conditions as well as uneven skin tone.

### Medical Strength Acne Therapy

This treatment was created by Dr. Colin Whitehurst a physicist in England to treat skin conditions from skin cancers to acne and vitiligo. It is a medical strength light therapy which aims to firstly kill the bacteria under the skin that causes the acne and pimples and secondly to heal and repair scars, pigmentation, redness and inflammation caused by the acne and pimples.

It also reduces the activity of the sebaceous glands and therefore improves the oiliness of the skin and reduces skin pore size. The skin is left brighter, healthier and rejuvenated, through the stimulation of collagen and elastin production by fibroblasts.

## Facials
